

## Discharge Summary Template

Date of Admission:

Date of Discharge:

Admission Diagnosis:

Discharge Diagnosis(es): List primary first

Condition at discharge: [stable, CMO, medically stable but remains suicidal, etc.]

*Brief* HPI: A summary of the pertinent findings from the admission HPI

Hospital Course: Organized by problem. Focused on *major* medication addition/change, lab results that influence care, interventions, complications.

Disposition: Where is the patient being discharged? [skilled nursing facility, home, inpatient psych ward, etc.]

Discharge Medications: List *all* meds patient is being discharged on. Can comment about changes from admission meds.

Discharge instructions: Specific instructions about diet, activity level, wound care follow-up, etc. This goes to the patient's PCP, so include anything that would be important to know as a health-care provider.

Pending Studies: List all studies that are pending and who will be responsible for following up on the pending results.

Follow-up: List all follow-up appointments scheduled for the patient.

Code status:

Signature:
