

## Post-operative Progress Note Template

<b>Procedure</b>	Patient is a ___ y/o male/female with a PMH significant for _____ currently on POD #___ s/p ___ [name of procedure]
<b>Subjective</b>	<p>Subjective: (note: this can be in paragraph form)</p> <ul style="list-style-type: none"> <li>● Overnight/24 hour events</li> <li>● New patient complaints [today patient reports feeling _____ ]</li> <li>● Pain [controlled or not? level of pain? improving? location? new pain? amount of meds taken for pain]</li> <li>● Diet: [tolerating PO, clears, etc]</li> <li>● Urination [voiding on own? Issues with voiding?]</li> <li>● Passing flatus or stool?</li> <li>● Activity level [walking, out of bed to chair, etc]</li> </ul>
<b>Review of Systems</b>	<p>ROS:</p> <p>Patient denies HA, fevers, chills, nausea, vomiting, diarrhea, chest pain, shortness of breath, abdominal pain, dysuria, weakness, etc.</p>
<b>Objective</b>	<p>Vitals: Tc Tm, HR, BP, RR, O2, Pain 0/10 (Include ranges for each value if possible)</p> <p>I/O: [24 hour I/O or since PACU]</p> <ul style="list-style-type: none"> <li>- IVF</li> <li>- PO intake</li> <li>- UOP: mL/kg/hr</li> <li>- Other [emesis, stool, drains, blood]</li> </ul> <p>Exam:</p> <p>General: [NAD, anxious, uncomfortable, lying in bed, etc]</p> <p>HEENT: [if applicable]</p> <p>Lungs: [CTAB, no wheezes, rales, rhonchi, etc]</p> <p>Cardio: [RRR, no murmurs, rubs, gallops, etc]</p> <p>Abdomen: [+BS, soft, non distended, non tender, etc, note abdominal drains]</p> <p>Extremities: [warm and well perfused, peripheral pulses +2, etc]</p> <p>Incision: [dressing is clean, dry, and intact. Incision is well approximated with ____.</p> <p>Bleeding/ecchymoses, erythema, pain, swelling, discharge?]</p> <p>Labs: [Only new labs]</p> <p>Imaging: [If necessary per post-op protocol]</p>
<b>Assessment and Plan</b>	<p>A/P:</p> <p>This is a ___ y/o male/female with a PMH significant for _____ currently on POD #___ s/p ___ (name of procedure). Patient is [stable, non septic, unstable, etc].</p> <p>Neuro: [pain well controlled with ____, change of pain regimen ]</p> <p>Cardiovascular: [continue IVF @ ____, d/c IVF ]</p>

Respiratory: [nasal cannula @ \_\_\_\_, wean supplemental O2, incentive spirometry, out of bed to chair, etc]

GI: [advance diet as tolerated, or continue NPO, clear fluids, etc.]

GU: [foley in place/remove foley, urinary output is \_\_ mg/kg/hr, continue lasix @ \_\_\_\_, etc.]

Heme: [continue sub Q heparin @ \_\_\_\_, DVT prophylaxis, SCDs ]

Endocrine: (mainly for diabetic patients) [continue sliding scale insulin and with meals.]

Infectious disease: [continue antibiotics regimen, name of abx + dose, day \_\_/\_\_. ]

Wound: [dressing changes and specifics ]

Dispo/other:

- Continue routine postoperative treatment
- Encourage ambulation
- Consults
- Imaging and lab follow up
- Further intervention
